Long Distance Walkers Association
Local Group Data Dashboard - June 2023

Welcome to your Local Groups Data Dashboard. The data within this dashboard is derived from 2 sources:

(1) Membership data - SiEntries membership database. The data was up to date as of 4th July 2023

(2) Social Walks/Challenge Events walks database collated by Chris Burrell. This was up to date as of 19th June 2023

The idea of this dashboard is to give local groups/the NEC a twice yearly snapshot in time of your group's membership and social/challenge walks, with a little bit of previous year's data added for information. This is an evolving dashboard and I have already had some excellent suggestions from local groups and NEC members on what they would like to see and which data could be useful to them. New data additions/layout will be included in the next update of the dashboard which will be mid January.

If your group would like something sooner please email me, I am happy to send you updates as/when you need them.

A note about membership numbers:

Family Memberships are made up of 2+ people so the number in the bottom left graph represents "X number" of people that have that membership type, so includes each person within a Family Membership rather than there being "X number" of families.

If you add the Individual Primary Members + Primary Family Members + Primary Other Members this will give you the total Membership for your group.
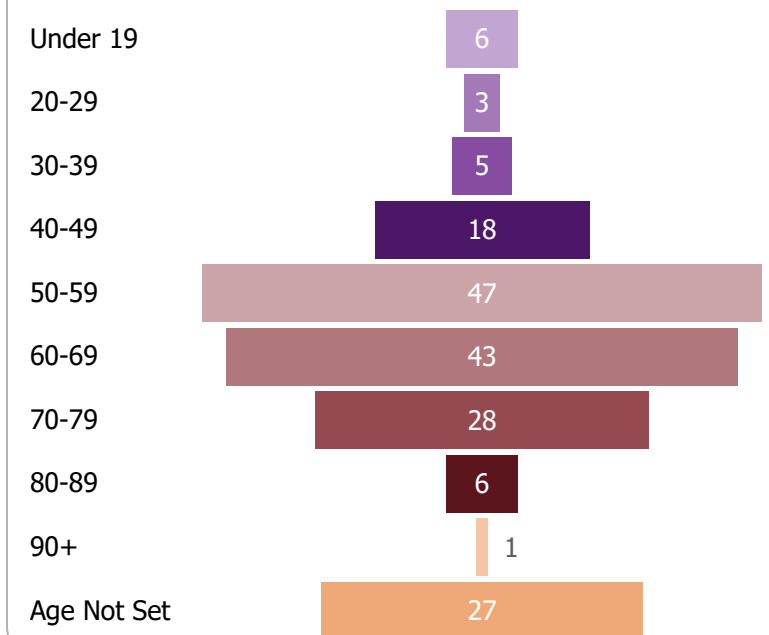

Primary Members

Individual Total	132
Female	68
Male	116
Gender Not Set	
Other Members	
Family Members	52

Associate Members

Individual Total	155
Female	93
Male	114
Gender Not Set	1
Other Members	1
