

Seventeenth Flower of Suffolk, 2nd October 2011, Results

For a change the weather forecast was 'hot and dry' and weather itself agreed! So unlike the deluges of recent years (forecast last year at least) it was probably the hottest October year in recorded history. An extra drink stop was added between CP3 and CP4 – much to the appreciation of the later walkers. The route itself was changed slightly to loop back through Dunwich Forest – cutting out the field section, with the CP4 being moved to the 5-ways car park. The environment agency had none of the paths closed (the one across the north edge of the Minsmere reserve is closed), so there were no last minute route changes.

The only minor panic was being unable to get into the hall until 7:20 because the keyholder had forgotten! The ensuing panic unloading meant I failed to find the Tri-Anglian badges (they'd fallen out of the box).

David Laight, 13th October 2011
