

ADOPT A TRIG PILLAR

This is a scheme launched by the Ordnance Survey as a way of ensuring that redundant trig pillars could be fostered by the general public. Our Club has been successful in our application for Cloughton G. P. 499000 Altitude 194 and Langdale G. R. 492800 494700 Altitude 244.

As a Club we will be responsible for keeping the area tidy, cement pointing and painting if it is a trig that has been painted in the past. Major damage of vandals or storm may be reported back to the O.S. Dept.

We are waiting now for the formalities of access to be arranged before we will write to the Department asking if we may put a plaque on the trig points.

THANK YOU
